

## Republic Services

The Governor's [Stay At Home Order](#) defines “Trash, Recycle, and Compost collection, processing and disposal” as critical services that may continue to operate.

**Republic Services will continue to operate daily collections for all customers with the following precautions to protect their staff:**

1. No collection of material outside of carts (trash, recycle, and compost). Republic Services wants to minimize any exposure to drivers and, as a result, drivers will not handle any bags, cardboard boxes, or loose debris.
2. All bulk collections are suspended. This is to prevent drivers from having to handle materials.
3. All yard waste collection outside of the cart is suspended - materials within carts will continue to be collected.
4. Recycle/compost collection will continue as normal unless there is a change to the public health order.

## Recycling

The continued operation of the Boulder County Recycling Center and related collection services means that residents should continue to recycle. Place your recycle and compost bins curbside according to your hauler’s weekly schedule.

## Compost

A-1 Organics are also still processing compostables. Place your compost bins curbside according to your hauler’s weekly schedule.
